What does the fund invest in?

The Fund's fundamental investment objective is to provide the opportunity for capital appreciation and income for the purposes of funding a post-secondary education anticipated to begin between 2034 and 2036. The Fund will primarily invest in a diversified mix consisting of exchange trade funds providing exposure to fixed income, money market, cash equivalents and equity securities. The actual asset mix of the Fund will be adjusted on a quarterly basis as the investment portfolio transitions over time, from an emphasis on equities to an emphasis on fixed income securities. When the Fund approaches its end date, the asset mix transitions to a substantially more conservative mix with the majority of assets allocated to fixed income securities and/or money market and cash equivalent securities.

How risky is it?

The value of the Fund can go up as well as go down. You could lose money. One way to evaluate risk is to look at how much the Fund's returns change over time. This is called 'volatility'.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

C.S.T. Spark Inc. has rated the volatility of the fund as low to medium. Because this is a new Fund, the risk rating is only an estimate by C.S.T. Spark Inc.

Generally, the rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A Fund with a low risk rating can still lose money.
